Customer Problem Statement Template:

This paper describes a method for tracking school-age children's pick-up and drop-off times to improve their safety while travelling to and from school every day.

- Children are the foundation of a country; if their future was threatened, it would have an impact on the development of the whole country. In this world, a child goes missing every 40 seconds.
- As a result of the abuse, children lose their emotional and mental stability, which has a negative impact on their career and future.
- Parents are in charge of raising their own children. However, parents are compelled to want for money because of the state of the economy and their desire to concentrate on their child's future and job. Consequently, it becomes challenging for them to constantly cling to their kids
- . • The system features a created web-based database-driven application that facilitates its operation and gives authorized staff relevant information about the kids.
